

WIDE RANGING KNOW-HOW IN MANY INDUSTRIES

SCHEUCH has been a highly qualified partner for ventilation and environmental technology for more than 40 years. During this period, SCHEUCH equipment has proven itself thousands of times in installations around the world. Our know-how spans the wood processing industry, particle and fibre industries, as well as the metal industry and industrial minerals.

In starting phase the focus of our subsidiary in Montreal lies on the wood based panel industry. The other industries are supported from our head office in Austria.
